Fragments, React and Widgets

pablomolina.me/r/liferay-fragments

" Fragments are simple, are just some pieces of HTML, CSS and JavaScript that can be added to a page and easily managed by FrontEnd developers... "

" ... But now they have more capabilities and are more complex, lets see the differences. "

Me, liferay.dev/blogs/-/blogs/fragments-react-and-widgets

Summary

0. Widgets

1. First fragment

2. Adding editable values

3. Using FreeMarker

4. Writing configuration

5. Using React

6. Next steps
